**DECLARATION OF WILLIAM
HOLMBERG IN SUPPORT OF
PLAINTIFF'S MOTION FOR
DECLARATORY RELIEF AND A
PRELIMINARY INJUNCTION**

Date: August 15, 2008
Time: 9:00 a.m.
Dept: 8

Action filed: July 22, 2008

E-FILED: Jul 24, 2008 3:07 PM, Superior Court of CA, County of Santa Clara, Case #1-08-CV-117885 Filing #G-9873

1 I, WILLIAM HOLMBERG, declare:

2 1. I provide this declaration in support of Plaintiff's Motion for Declaratory Relief and
3 a Preliminary Injunction. If called as a witness, I could and would competently testify to the
4 matters set out in this declaration.

5 2. I am the Corporate Quality Assurance Manager for Domino's Pizza LLC. I have
6 been with Domino's since March 2000 and have been working with nutritional information since
7 2004. I am responsible for providing/updating nutritional information for Domino's consumer
8 website, printed materials, school lunch program, and answering nutrition related consumer
9 questions. I have an M.S. in Food Science and Technology

10 3. Domino's Pizza offers customers a complete nutrition guide on its website and in
11 many of its pizza stores. The nutrition guide allows customers to calculate precisely the nutrition
12 contents of their made-to-order pizza. The nutrition guide contains a grid which lists each style of
13 pizza and each topping along the left side. For each listed ingredient, Domino's Pizza provides the
14 measurement of calories, carbohydrates, sodium, fat, protein, fiber, sugar, saturated fat, trans fat,
15 cholesterol and Percent Daily Value of vitamins A and C, calcium, and iron. By following the grid a
16 customer can calculate the calorie count and other nutrient values of any ingredient he or she has
17 selected, add up the numbers and obtain accurate calorie and other nutritional information about his
18 or her pizza order. A copy of the nutrition guide is attached as Exhibit A.

19 4. Domino's Pizza disagrees with Santa Clara County's Ordinance NS-300.793 which
20 would require Domino's to provide a calorie range for items on its menu boards and ranges for
21 calories and certain other nutrients (saturated fat, trans fat, carbohydrates, and sodium) for items on
22 its menus. Every pizza is customized and prepared to order. Because of the multiplicity of
23 combinations of crusts and toppings for our pizzas, Domino's will be forced to post very wide
24 ranges of nutritional information for its pizza offerings. Domino's Pizza believes that listing ranges
25 of nutritional information is a poor and inadequate way to communicate with its customers because
26 Domino's is being forced to give information that is not very useful to the customer. A range of
27 140-460 calories per serving for a pizza, for example, is not useful information to a customer and

1 will likely create customer confusion. A customer may ask where in the range the pizza he has
2 ordered falls, or may question what ingredients will yield a pizza with a particular calorie count, and
3 may become frustrated when his questions cannot be answered to his satisfaction. Domino's Pizza
4 has developed a complete nutrition guide which gives customers calories and other nutrient
5 information that is accurate and that they can use in planning their meals. Domino's objects to
6 having to post information on menus and menu boards that is not of use to customers.

7 I declare under penalty of perjury of the laws of the State of California and the United States
8 that the foregoing is true and correct.

Domino's Pizza®

NUTRITION GUIDE

Using the Food Pyramid as a guide, Domino's Pizza can be part of a healthy, balanced diet.

Because pizza is customizable, it is possible to enjoy a variety of foods (bread, vegetables, cheese and meats) in a single slice.

We choose our ingredients on the basis of safety, taste and nutritional content to bring our consumers what they want.

Domino's Pizza dedicates its attention, energy and resources to one mission: Deliver a delicious, hot and fresh pizza made with the highest quality ingredients, every time.
